Note:

This hazard identification checklist (HICL) and relevant hazard close out sheets (HCS) have been produced to identify and closeout hazards associated with the installation of a Next Generation RETB system to West Coast Railways' Class 47 locomotives.

The full list of hazards was reviewed by all project stakeholders at the Detailed Design Review held at Kingmoor Depot on Wednesday 26th November.

For the purposes of this HICL and HCS the item number shown shall be used to identify the equipment and relevant hazards/close out information.
